

# #WeRateDogs 2020

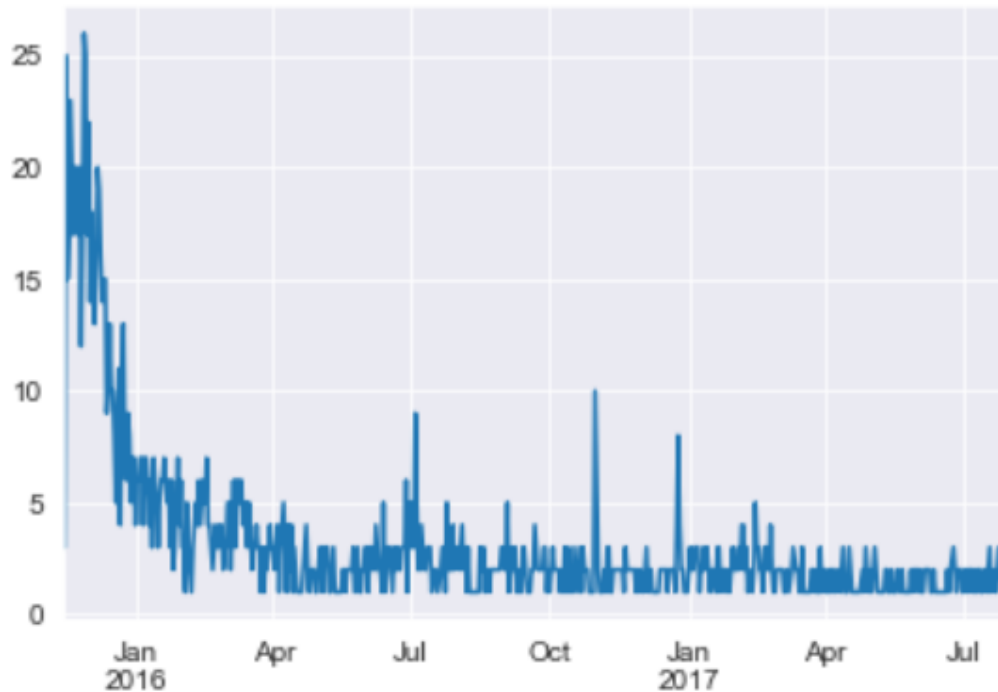

By @Mahmoud Omar

**WeRateDogs is Twitter account that rates people's dogs with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity**

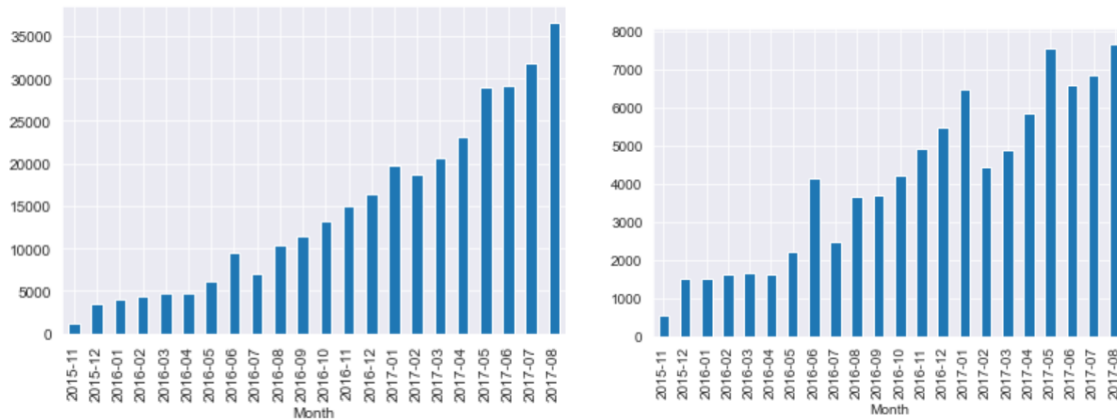

**The collected data belongs to some tweets between November 2015 and August 2017**

**It is clear from the analysis that once this account was launched, the rate of tweets was high then it started to degrade with time**

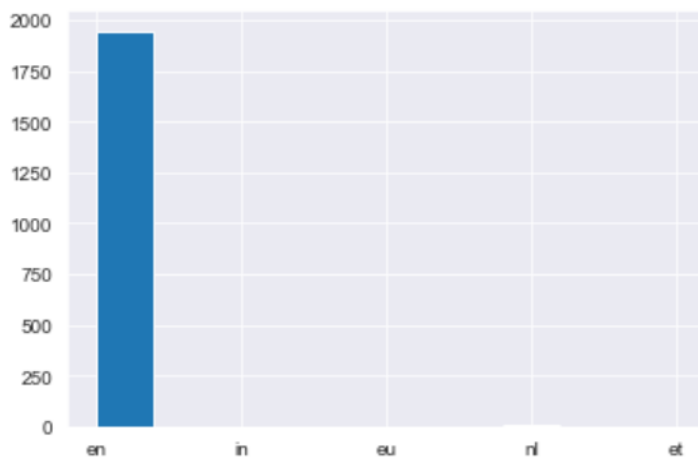

**But on the other hand, we can see that the rate of retweet count and favorite count are increasing dramatically which is an indication that with the less contributions over time , there is much higher followers which are interacting more than the early stages of the account launch**

**Also it is an indication that in the early stages , lots of followers where posting non Dog pictures or pictures with low quality then later they started more funny and professional pictures for their favorite pet(s)**

The various followers for this account are mainly tweeting in English while very few other languages like Indian / Spanish ...etc. are found but their share is very minor is highlighted in the below chart .

Followers are sharing pictures about their pets with their various stages, however combined pictures for doggo and puppo are getting more favorites and retweets then tweets containing either doggo or puppo comes in the second place
